

# This Could Go on Forever

Andi Deris

Listen how strong the winds are blowing  
They sing the salt of the sea into my life  
Glad I'm with you, babe  
Look how deadly the waves are coming in  
If you want to survive you get to dive  
How I would miss you, babe

This could go on forever  
Go on exactly as it is  
This could go on forever

Feel the rays coming bright and warming  
See the grey rip apart because of light  
Yeah, got to kiss you, babe  
Smell the sulfur right from the mountain  
Feel the tremble that wanders in the ground  
How I would miss you, babe

This could go on forever  
Go on exactly as it is  
This could go on forever  
Let all be the same  
Enjoy what became  
Adore what's behind  
And love what to find  
This could go on forever  
Go on exactly as it is  
This could go on forever
