

## Sister

Andrew Belle

Sister I remember  
Mother kept happy when she could  
Weather in December  
Never felt as warm as it should  
You were like a feather  
Never land where we thought you would  
Or anywhere close to it  
Who would have thought you never would

So tell me what happens

When the waves break  
And you're surrounded  
He tries to kill you  
And you allow it

Sister I remember  
The morning light on evergreen  
What seemed like forever  
Was just my mind escaping me  
Imitation leather  
The smell of blood left on the seat  
Was that your way of proving  
We look the same from underneath

So tell me what happens

When the waves break  
And you're surrounded  
He tries to kill you  
And you allow it  
And you allow it

Over and over he says  
I surround you  
I surround you  
I never leave my beloved  
I've found you

I surround you  
I surround you, I  
I never leave my beloved  
I've found you
