

Sound is a wave like a wave on the ocean
Moon plays the ocean like a violin
Pushing and pulling from shore to shore
Biggest melody you never heard before
What if I were the night sky
I were the night sky
Is my lullaby to leave burn

What if we hadn't been born at the same time
What if you were 75 and I were 9
Would I come visit you
Bring you cookies in an old folks home
Would you be there alone
And when the late summer lightning fires off in your arms
Will I remember to breathe no I never will
And if I could convince you that I mean you no harm
Just want to show you how not to need
If I were the night sky
If I were the night sky
Here's my lullaby
My lullaby to leave by
My lullaby to leave by
If I were the night

What if we hadn't been each other at the same time
Would you tell me all the stories from when you're young and in
your prime
Would I rock you to sleep
Would you tell me all the secrets you don't need to keep
Would I still miss you
Or would you then have been mine

Sound is a wave like a wave on the ocean
Moon plays the ocean like a violin
