

Earth And Venus

Andy Davis

I heard that the earth had a thing for venus
big cities and those skyscrapers they could
never turn her head
and it feels the same with you
yeah my world gets lonely too

wherever you are you're never close enough
don't be afraid of love, yeah keep waiting
and I can't get in if you never open up
don't be afraid of love, yeah keep waiting

you push me away and you say you'll never love again
oh you can see it's a beautiful thing, but I see it's frighteni
ng
so you go build a wall
and i'll stay here til it falls

yeah you're always just a few
steps behind and i just can't find you
i keep it locked away
when you don't have to hide
you don't have to hide
