Desire

Ah.... Ah.... We may be big or small or black or white , eternally And black and white is you and me in a special light We may be young or old or in between, but this much I know Together we can learn to grow In a world that's ever turning it's back on you If you give it all away, make it mine, ine, ine, ine, mine You are desire, ev'rything you need I give you right or wrong And you are the woman that I base my whole existence on And when I get to you my desire is glowing in your light

These are the golden years we get to live we lead the way, tomorrow we can start today in a special light Love could be good or bad or in between but this much I learn Baby, you and I can learn In a world that's rearranging it's reality If you give it all away make it mine, ine, ine, ine, mine You are desire, ev'rything you need I give you right or wrong And you are the woman that I base my whole existence on And when I get to you my desire is glowing in your light Ah...

And it's nice to light a fire when it's cold outside If you give it all away make it mine, ine, ine, ine, mine You are desire, ev'rything you need I give you right or wrong And you are the woman that I base my whole existence on And when I get to you my desire is glowing in your light
