

# Freeze

Andy Grammer

Too good, it makes me nervous  
That we could ever keep this pace  
And I know that's probably stupid  
But that's my brain  
Oh, I know that nothing's perfect  
But we are in a perfect place  
And I don't wanna lose it  
I don't want the stars to fade

You make me wanna hit freeze  
Stay forever in this moment  
Polaroid, I wanna hold it  
You make me want to, you make me want to hit freeze  
Time is slipping through my fingers  
Tryna check the universe  
Can we, we

I just want to hit freeze right now, now, now  
Oh, I just want you and me right now, now, now  
Oh, I just want to hit freeze right now, now, now  
I wanna hit freeze

'Cause nothing is for certain  
But I'ma keep you up all night  
Trying to get every word in  
While we have time  
Heaven knows that the seasons change  
We might be in our golden age  
Forever will look different every day  
Not trying to live yesterday  
But there are some things that should stay the same  
Oh, slow and steady, this is not a race

You make me wanna hit freeze  
Stay forever in this moment  
Polaroid, I wanna hold it  
You make me want to, you make me want to hit freeze  
Time is slipping through my fingers  
Tryna check the universe  
Can we, we

I just want to hit freeze right now, now, now  
Oh, I just want you and me right now, now, now  
Oh, I just want to hit freeze right now, now, now  
I wanna hit freeze

You make me never wanna leave  
Stay forever in this moment  
Polaroid, I wanna hold it  
You make me want to, you make me want to be me  
Time is slipping through my fingers  
Tryna check the universe  
Can we

Make me wanna hit freeze  
Stay forever in this moment  
Polaroid, I wanna hold it

Make me want to, you make me want to hit freeze  
Time is slipping through my fingers  
Tryna check the universe  
Can we, we

I just want to hit freeze right now, now, now  
Oh, I just want you and me right now, now, now  
Oh, I just want to hit freeze right now, now, now  
I wanna hit freeze
