

The Greatest Moments

Andy Shauf

Please don't leave me standing here again,
Without saying goodbye
All i need was a goodbye

'member when we stayed awake at night, to talk on the phone
all the things we do to be all alone

please don't tell me lies about the things you don't understand
can we please just sit down
feels a million pieces here evolved and they're all going to be
when they city lights are hung in the night sky

I'll be the starry night for you and me if you let me
And ill be the darker day when we're on our way if you need to

Things I wont hide,
Hands in the sky,
And the greatest moments
Are memories of you and I,
Oh you and I
