

# Watching Me From Afar

Anette Olzon

Like every wind that blows  
And stars that glow  
Deep in the darkest night  
You're my light

From all the flowing trees  
To little bees  
Beneath what's wrong or right  
You're the air I breathe

Just like a melody  
Floating over time and space  
I see your face  
No matter where you are  
No matter how near or far  
You're in my heart  
Like a star  
Watching me from afar

Deep in the darkest time  
Your shine on mine  
Show me the way to climb  
Do what's right

For every single word  
You're in my world  
The doubts just disappear  
You're the one I hear

Just like a melody  
Floating over time and space  
I see your face  
No matter where you are  
No matter how near or far  
You're in my heart  
Like a star  
Watching me from a far

Just like a melody  
Floating over time and space  
I see your face  
No matter where you are  
No matter how near or far  
You're in my heart

Just like a melody  
Floating over time and space  
I see your face  
Like a star  
Watching me from a far

Like a star  
Watching me from a far
