

## Sara Tavares - Balance

Angel Haze

I'm starring at the view from the height of my past pain  
Ironic I'm tryin' to come in first if it's the last thing  
They try to throw me off but I won't let 'em pass me  
They kill me with the hating but I ain't in the casket  
I got to stay on top, y'all don't fucking over come shit  
I had to learn to beat it like I just got a drum kit  
Now my motto, keep faith stay strong  
Reprover is stay positive and fuck anyone that say opposite  
'Cause everybody don't wanna see you win  
In the end your biggest enemy is maybe your friend  
Keep losing my balance that's the prize of winners song  
Tryina' to find God in the eyes of a sinner  
'Cause me I'm like the victim through the eyes of a killer  
Guns aimed out of worth in the pride that's what been on  
I'm the up prize in the lives of demise and devastation  
A low peace of heaven left in Satan ,surreal

So what if it hurts, the struggle is first  
To live is to die we all suffer the curse  
And love is the cure until we suffering worse  
Pleasure is pain,the suffering's first

Twisted out of my life, my friends said that I changed  
But how the fuck you make a difference and still stay the same  
They don't carry the weight , they can't handle the pressure  
So they can see me involved but they keep catching my essence  
My life is insane but I don't get enough credit  
But the picture ain't realistic life a photoshop edit  
How could you even be mad that I was wanted enhanced  
Say I just to hide an option like empty advance  
Tap, so fuck 'em all they rather see me fail  
I hit the main stream and my ship gone sail  
And niggers gon' hate and some gon' plug me  
But I remain a problem that nobody resolve it  
And I got this acke in my soul and it's distant now  
'Cause I'm hotter than the flames on a piston now  
I keep losing my balance that's what trips me out  
Keep my emotions inside 'til I'm flipping out  
But I won't trip , I stand tall just keep my head and hold on  
I said I won't trip , I stand tall just keep my head and hold on

So what if it hurts, the struggle is first  
To live is to die we all suffer the curse  
And love is the cure until we suffering worse  
Pleasure is pain,the suffering's first

Sometimes I feel like I'm bound to be a sellout  
So I spit fire to try to let this hell out,to try to let myself out  
This cage I trapped myself in,but I won't let myself in  
I feel like if I'm beside of me I won't let myself win  
And I won't let myself in and I'll be damned if I do  
I enjoy being myself, I'd be damned if I'm you  
See I give them what they nedded and that's the real shit  
And I do it with my heart so they can feel this

That's why the words in my songs read broken bonds  
Make 'em strong show 'em they got more to focus on  
And music is the only thing I put my hope in  
Use words to capture my mute emotions  
I'm like an umbrella top high I'm hit with a brain  
But I walk when it hurts like the ligaments break  
And my thoughts like a frame to the picture I paint  
I get high off the green like the top of Touraine  
They can't extinguish the flames from my mouth when I speak  
I got beauty and peace like a tropical beach  
And I got me some dreams that I won't stop 'til I reach  
And Dr. Kings bitch in the mouth of a freak

So what if it hurts, the struggle is first  
To live is to die we all suffer the curse  
And love is the cure until we suffering worse  
Pleasure is pain, the suffering's first
