

## Into The Dark

Angel Witch

It's a stellar vibration encircling us  
Turning our brains into dust  
Cosmic rays of the pagans's fate  
And the heathens travel beyond the void

Relative power indulges through the universe  
Genocide to the ozone layer  
The aliens from the stratosphere's curse  
Blows our minds to an evil prayer

The black hole makes its mark  
Sucks us down into the dark

Is there another of the force of life?  
Through the hole we could escape  
Into all, while we travel as life  
To understand what we might find

Into the dark
