

Something Wrong

Angel Witch

I've been waiting, I've been watching you
you've been acting so strangely
When I see you, looking worried
There's no smile in sight

I never see you in the day light
When I call, they say, you're not there
But when I see you, as you are now
I know there's something wrong

And it makes me want to bleed inside

Just keep away
Don't come near me
You will only get yourself hurt

I am noble, I have seen you
You know just what I am

I cannot see you, anymore now
I can see you from a distance
I am falling out of this life
The one that's in my mind

And it makes me want to bleed inside
And it makes me want to bleed inside

(Guitar solo)

And it makes me want to bleed inside
And it makes me want to bleed inside

And i know there must be something wrong
