

Baal Arise

Angelspit

Devil hands, workin' so busy
Nitro ghost, in a feeding frenzy
Bite their love from the face of God
Now they thirst for more oil and blood

While maggots gorge
On the rotting flesh of god
...and we sing

I love you, now swallow these pills
From hell's heart, banquet of bullets
Shepherds lead thee where the wolves don't sleep
The fallen King rules a flock of dead sheep

And when you die they swarm over your fortune
Like the maggots that swarm over your corpse

It drives you into the dust
Then Steps over your carcass to snag the next one

Baal arise
God of the flies
Hallelujah ruin
Excelsior burning

I am Baal ze Baal
