

## First Time

Angie Stone

Mornings give to me spreads of coffee beans lying  
Right here next to me it's amazing  
Always does me right fills my appetite  
Let my enemy take flight it takes me

You've gathered so many stars  
So you can gather 10 million more  
Your love is so brand new every time I see you

Happy endings feel like it's the beginning  
When I'm with you I'm in it  
And when you lay me down feels like the first time  
Happy endings feel like it's the beginning  
When I'm with you I'm in it  
And when you lay me down feels like the first time

Thinking about tonight how you gonna love me right  
How I wear that thing you like come take me yeah  
When I close my eyes you're the person on my mind  
Chills go up and down my spine  
Oh baby yeah

You've gathered so many stars  
So you can gather 10 million more  
Your love is so brand new every time I see you

Happy endings feel like it's the beginning  
When I'm with you I'm in it  
And when you lay me down feels like the first time  
Happy endings feel like it's the beginning  
When I'm with you I'm in it  
And when you lay me down feels like the first time

All the ladies in the spot love the man you got  
Say yea yea, yea yea  
And all the brothers in this place if your girl can't be replaced  
Say yea yea, yea yea  
All sing up with you could making good love too  
Say yea yea, yea yea  
And everybody here together with good love forever  
Say yea yea, yea yea

Happy endings feel like it's the beginning  
When I'm with you I'm in it  
And when you lay me down feels like the first time  
Happy endings feel like it's the beginning  
When I'm with you I'm in it  
And when you lay me down feels like the first time  
(2x)
