My life and I Surely I can testify When life gets you down You need a true friend around

Whenever I need you you're always there You near here to listen show me love and give me wisdom Someone who understands me and cares about my feelings Girl I love you so and I want you to know

Let's make a vow that we'll keep this together You are my sister no matter the colour A friend in need is a friend indeed My sister, my sister you can always count on me

When I seem tossed and drilled You uplifted me with worship given Dragged through some things And I'll forever be your sister in return

I'm here for you and you're here for me
That's how a friendship supposed to be
Come day or night storm some rain or shine
We'll stay side by side for the rest of my life

Let's make a vow that we'll keep this together You are my sister no matter the colour A friend in need is a friend indeed My sister, my sister you can always count on me

With each other we can win
We will always be best friends
And it's you that I can rely all to let me know
With you by my side and Him as our guide
You don't have to worry nah,
'Cause you are my sister

Let's make a vow that we'll keep this together You are my sister no matter the colour A friend in need is a friend indeed My sister, my sister you can always count on me

Whenever you need me Call Whenever you want to Whenever you need me You're my sister
