

Sprouts of Time

Angra

I lay my eyes in the past
From the first day to the last
Several things we had to learn
Countless mistakes from times of yore
Now we restart, we recreate
Your present is your fate
Don't turn your backs on mankind!
Only yourselves you wanna save
Ignorance burns just like a fire
Consuming people on its flame
Fellow creatures, so wonderful!
So different and so grand
Sprouts of time
The roots evolving
The seeds for the future
were scattered yesterday
Tomorrow's harvest field we plant
today
Your crown will ever last
The tall trees of life
(Life experience)
Break your shell reach the light!
(Mind and sould)
Find your path to the skies
(Will come around on a thunder sound)
Raging with power and fury the new
born world
Sprouts of time
The roots evolving
The seeds from the past
branching out
Growing forever
Hands on heart
Embrace each other
The dances, the faces, the smiles
Behind the past
New seasons bring the chance
To start again
Tall trees will ever last
The circles of life
