

Take You Away

Angus & Julia Stone

When you're feeling down
And your sky is gray
And the people that you love
Well, they have nothing lovely to say

When your days are long
And lonelier than before
When your bed is cold
And the sheep are at your door

I'll take you away
I'll take you away
I'll take you away
I'll take you
I'll take you away
I'll take you away

When you're tired of working
Like a slave
And the smell of the coffee bean
Well, it just won't go away

And your friends, well they've got
Nothing good to say
You just call you my name

And I'll take you away
I'll take you away
I'll take you
I'll take you away
I'll take you away

I'll take you away
I'll take you away
I'll take you
I'll take you away

I will take you away
