

Star Matter

Ani DiFranco

Love gets started and next thing you know
It leaves everything else behind
Love sets fire to your schedule
And then calls an end to time

And love ain't far behind you
Love ain't far behind

And when we're parted it's always too long
And every time you come back you come back so strong
And as soon as we can we gotta go lie down
In that place where our breath is one sound

And love ain't far behind you
Love ain't far behind
No, love ain't far behind you
Love ain't far behind

And I was there to hear your bell
The first time it rang
And the beauty was the beauty of everything
Yeah, we are star matter from the big bang

And that love ain't far behind you
Love ain't far behind
That love ain't far behind you
Love ain't far behind
No, love ain't far behind you
