

Meet the Light Child

Animal Collective

Hey, girl
This leaf I brought for you was ordinary
Set for sailing
Goodbye, oceans

Hey, girl
I brought your lead kazoo to make sweet music in our garden
The smallest chorus would applaud you

Tiptoe away so you don't hear me
I'm pearl white
come inside with me

Hey, girl
Here's an ancient jigsaw puzzle
With dragons and mountains
And two fish are now near a river

Hey, girl,
Lastly is your lover's picture
I knew that you'd want to see him
He told me that you are golden

I brought the lunch so I might eat with you
I sent milk with cookies

When I find metal from the sky
Came falling where I died
And crushed all of my bones
I'm living

Cement came pouring down
My head was stuck in mounds that
Would run down my mouth
Well, my face is covered now

Through my
They're telling me now
Let it go
Come on
Play
Meet the light child
