

## That's Not What I Said

Anita Cochran

That's not what i said but if that's what you heard  
Then you didn't hear one single word  
We're so far apart, something is missing  
It makes it hard when no one is listening  
I say black, you say white  
I say day, you say night  
We don't talk anymore without keeping score  
I say i need time, all you hear is goodbye in your head  
If that's what you heard  
That's not what i said  
Not long ago, there was a time  
We were so close that you read my mind  
Now things that we say end up being hurtful  
Lately it seems we go 'round in circles  
I say black, you say white  
I say day, you say night  
We don't talk anymore without keeping score  
I say i need time, all you hear is goodbye in your head  
If that's what you heard  
That's not what i said  
Let's lay down our gloves, pay attention to love  
It doesn't matter who's right  
Or who's wrong  
If we don't change baby it just keeps going on and on  
I say black, you say white  
I say day, you say night  
We don't talk anymore without keeping score  
I say i need time, all you hear is goodbye in your head  
If that's what you heard  
That's not what i said
