

Allison

Anjolie

Allison you got me on a treasure hun
Golden gun been looking for you Allison
Heart shaped mouth seen green eyes
Cold heart wind starlight smile

Building in took your time
Want my love but I can't find you I can't find you
Allison you caught behind everyone
On the run it seems we're for Allison

And so you tell yourself there's nothing for you to die
I know it feels like hell you got that look in your eye
They want you Allison they're screaming Allison
Keep me on the run you keep me on the run

You keep me on the run you keep me on the run
Jealousy you really got a hold on me
Honestly I've been thinking about you heavy
Heart shaped mouth seen green eyes

Cold heart wind starlight smile
Building in took your time
Want my love but I can't find you I can't find you
Allison you got me on a treasure hun
Golden gun been looking for you Allison

And so you tell yourself there's nothing for you to die
I know it feels like hell you got that look in your eye
They want you Allison they're screaming Allison
Keep me on the run you keep me on the run

You keep me on the run you keep me on the run
You keep me on the run you keep me on the run
The run
Allison Allison
They want you Allison
They're screaming Allison

And so you tell yourself there's nothing for you to die
I know it feels like hell you got that look in your eye
They want you Allison they're screaming Allison
Keep on running

Keep me on the run you keep me on the run
You keep me on the run you keep me on the run
You keep me on the run you keep me on the run
They're screaming Allison
They're screaming Allison
You keep me on the run you keep me on the run
