I wish you well Couldn't you tell after all these years? I wish you love And life in a world that you're dreaming of

I wish you well, I wish you love I wish myself all of the above

What made me think?

That I could survive all the wear and tear

It's not my thing

To stand here and pose for some William Tell

I wish you well, I wish you love I wish myself all of the above

If there was a better time I could not find it What's mine's not yours and yours not mine And we couldn't hide it
Don't take me on the ride with you
It's a roller coaster
The only time I'd look at you was on a
Rock and roll poster

Where are you now?
Couldn't you see through the sweat and tears?
I took my bow
While you confirmed all my saddest fears

I wish you well, I wish you love I wish myself all of the above

If there was a better time I could not find it What's mine's not yours and yours not mine And we couldn't hide it
Don't take me on the ride with you
It's a roller coaster
The only time I'd look at you was on a
Rock and roll poster

I wish you well, I wish you love
I wish myself the world I'm dreaming of
I wish you well, I wish you love
I wish myself all of the above
All of the above
