

# My Life's A Dance

Anne Murray

The world was just a ball rolling around the sun  
A million miles away from any other one  
My life was just a dance where sometimes the music played  
I held it in my hands 'til only the melody remained

And you were just a wish under a paper moon  
A whisper on my lips that never could come true  
But here you are with me and I'm like a child again  
You set this prisoner free just when I thought I'd reached the end

Now when I look into your eyes I see  
You were given as a gift to me  
I know that you and I were meant to be together  
If there's a Heaven shining up above  
I wanna thank the one who let your love come shining through  
'cause now my life's a dance I dance with you

Now I understand just what I'm living for  
I can't remember how I ever did before  
My heart is full of life I never knew was there  
'cause through the light of love I see the world we're meant to share

Now when I look into your eyes I see  
You were given as a gift to me  
I know that you and I were meant to be together  
If there's a Heaven shining up above  
I wanna thank the one who let your love come shining through  
'cause now my life's a dance I dance with you

Now when I look into your eyes I see  
You were given as a gift to me  
I know that you and I were meant to be together  
If there's a Heaven shining up above  
I wanna thank the one who let your love come shining through  
'cause now my life's a dance  
In everything I do  
My life is just a dance I dance with you
