

# The Day You Strayed

Annie Haslam

Came the day you strayed into my life  
And everything was turned around  
Since the day you came into my life  
My world is full of sweeter sounds

And the day's you've loved me in my life  
Have changed my every point of view  
Since the day you came into my life  
My time I love to share with you

And I know that all my friends said you're deceiving me  
I know that you were capable of leaving me  
And you could stray away  
Some lonely day

These the days, the best of all my life  
Will live inside my heart and mind  
Should you stray, the rest of all my life  
I'll keep the love you left behind

These the days, the love of all my life  
I live with all the love you give  
Should you stay, the rest of all my life  
I'll love you for each day we live

And I know that all my friends said you're deceiving me  
And I know that you were capable of leaving me  
And you may stray away  
And you could stray away some lonely day

These the days the rest of all my life  
I know I'll spend them loving you  
If you stray, the best of all my life  
Will leave me and will go with you
