I know the drill You got your ball and chain It holds you down, the circle round This story stays the same

It won't be long
And then your heart is frozen
The time has come to break away

You've got it all What makes you hesitate? Don't just wait for things To blow up in your pretty face

Lift the weight
Try not to let it slip away
And you may find yourself again

I feel people just don't know you like I do Why you're making it so hard to see When there's something wrong It goes on and on

I know the drill You've got your ball and chain I found out the second round That some things never change

Open my eyes
And let the days come over me
And maybe it will go away

I feel people just don't know you like I do Why you're making it so hard to see When there's something wrong It goes on and on

You'll see not everybody's here To break your heart So there is a price to pay To be someone you're not

I know the drill You've got your ball and chain I found out the second round That some things never change

Open my eyes
And let the days come over me
And maybe it will go away
