

I spy, I spy a tear in your eye
So I'll try, I'll try to get you out of here
You sigh, just move a little closer
Time flies, soon the night is over

Morning, noon, night, all day
All I ever wanted was for you to come my way
We've got time so let it slide
Roll me over get on top
Yes baby let's turn off the lights
And make an end to my lonely

An end to my an end to my
An end to my an end to my
An end to my an end to my lonely
An end to my an end to my
An end to my an end to my
An end to my an end to my

I'm high, so high when you're with me
I might, I might stay all night
You, oh my, you're such a wild boy
Yeah time flies, soon the night is over

Morning, noon, night, all day
All I ever wanted was for you to come my way
We've got the time so let it slide
Roll me over get on top
Yes baby let's just lose our mind
And make an end to my

An end to my an end to my
An end to my an end to my
An end to my an end to my
An end to my an end to my
An end to my an end to my
My lonely

Welcome to the other side

An end to my an end to my
An end to my an end to my
An end to my an end to my
An end to my an end to my
An end to my an end to my
An end to my an end to my
My lonely life
My lonely life
My lonely life
Lonely life

Welcome to the other side, yeah
Welcome to the other side
