

Paradise

Anthem Lights

I've never believe in love at first sight
But I believe you know when it's right
One thing's for sure feelings come and go
When the right one comes along, your heart will know
Well the look in your eyes right now, girl
Girl you're proving it right, right now

I'm looking at paradise tonight
I'm staring at heaven in your eyes
Actually believe you are
What I've been looking for
Beauty on the outside
Beauty on the inside
You're my paradise
You're my, you're my, my
You're my paradise
You're my, you're my, my
I'll leave my whole wide world behind
You just say the word

Never felt so high, fly like a bird
And I'm throwing my checklist out the window
I know you feel it too so girl let's go
Just look in my eyes right now
I can make you believe right now

I'm looking at paradise tonight
I'm staring at heaven in your eyes
Actually believe you are
What I've been looking for
Beauty on the outside
Beauty on the inside
You're my paradise
You're my, you're my, my
You're my paradise
You're my, you're my, my

And I ain't moving
I'd die before I lose it
This world can pass me by
'Cause I found something real
Tonight, tonight, tonight, tonight

I'm on a late flight
Looking out the window tryina see if I can picture you dreaming
What a late night, lost in the stars
But the only thing I see you sleeping
Wishing I could be the one that tuck you in
Girl you the vision of beauty and truly my best friend
Wait, remember when we both said yes
So much love I could feel it in my chest
Paradise lost now found,
I could be your Channy, white house down
You can be my Megan Fox and transform me
Into an autobot that rise no more boring
Nights alone, waiting by the phone
Moving that's the one who turn the high into your home

But you ain't gotta worry, I'ma make your life easy
You my paradise, stay breezy!

I'm looking at paradise tonight
I'm staring at heaven in your eyes
Actually believe you are
What I've been looking for
Beauty on the outside
Beauty on the inside
You're my paradise
You're my, you're my, my
You're my paradise
You're my, you're my, my
