

Machines of War

Anthidora

Lost in the silence a gaze full of violence
He waits the night of jackals to come
A new breed is rising to rule on the world
Cyborgs are looking for you

Machines of war
We are the machines of war

I am the first of a new breed of cyborgs of steel
I am the weapon supreme
The master of darkness and fear
The ruler that comes from hell

Machines of war
We are the machines of war
Machines of war, a mission we have
Machines of war, you'll be dead

Ready to go, ready to kill
Ready to burn down the land
The snake kills in silence, his eyes crave for vengeance
Beware! It's crawling straight down to you

Machines of war
We are the machines of war
Machines of war, a mission we have
Machines of war, you'll be dead
