

# When I Get There

Anthony Callea

I wish that i could breathe,  
A moment just to be here,  
A chance to take it in,  
Before i have to leave

So this is how it feels,  
To waki into a daydream,  
Can't tell you how my heart sings,  
To see it all for real

When you do, what you love, it feels amazing,  
If you do, what you love, you can do anything at all

I always said when i get there,  
I'll change the world, I'll take more care,  
I'll touch the sky, be more prepared,  
When i get there

The road rolls on and on,  
It twists a while and then it turns,  
Where here turns onto there's long gone,  
When you do, what you love, it feels amazing,  
If you do, what you love, you can do anything at all

I always said when i get there,  
I'll change the world, I'll take more care,  
I'll touch the sky, be more prepared

I packed my bags,  
I left my room,  
There's nothing more that i can think to do,  
Now i need to breathe,  
I just need to breathe

I always said when i get there,  
I'll change the world, I'll take more care,  
I'll touch the sky, be more prepared,  
When i get there
