

Everybody

Anthony Hamilton

Said it's alright
whoaa whoaaaa

We have seen some things in our lives, we have some long
and solomn roads, thats how i know
it's alright to cry, go on and ease a heavy load, pray hard,
walk tall, do right, find love hold on for life,
lord I know that you are there, I feel a burnin in my bones,
free us from the lions den and take us home.

Everybody needs love in their lives
everybody needs a little sun to shine
go on let love come inside your life
shine down on me

The sheppard and his angels guard our life,
go on joy comes early morn, the praise of the man
will sure subside, pain walk away cause here come love,
smiling, faithful, alright, find love hold on for life
lord I know that you are there, I feel a butnin in my bones,
free us from this lions den, and take us home

Everybody needs love in their lives
everybody needs a little sun to shine
go on let love come inside your life
shine down on me

Lord rain down on me and let your joy ease my pain,
take me from this lions den and let me smile again

Everybody needs love in their lives
everybody needs a little sun to shine
go on let love come inside your life
shine down on me
