

I Want Your Heart

Anthony Phillips

Cold streets, everyone's inside
There's just me driving through the night
I want your heart, I need your love
I wanted you from the very start
Storm winds swirling in the snow
The last bridge to carry me back home
I want your heart, I need your love
I wanted you from the very start
Nothing matters anymore
I've acted like a fool
Cos every time I find a door
It always leads me back to you
I never could resist the smile
Dancing in your eyes
Each town passes in a haze
I'm free now and i can hardly wait
Long roads coming to an end
I'm so close to holding you again
