Discharge

I wait, I hate Silence kills you like a loaded gun My time, you waste Resolution turn your back and run Drunk with power Your ivory tower Never stood, never could And around and around You hit the ground Reservation hellbound Most people cry When a person dies You wanna know why? Run it through, Discharge! Most people cry Not when you die You wanna know why? Nobody cried You lived a lie You lived a lie! Your life, what life? What's the difference between you and death? Overdose, comatose You won't even leave a corpse that's fresh Drunk with power Go take a shower I wish you would, I wish you could And around and around You hit the ground Reservation hellbound A surreal vision Of a human being Self inflicted crucifixion Suicidal contradiction Clusterfucked you load it up Clusterfucked you self destruct Get off my dick, it's sick I refuse to feel sorry for you I can't, believe People put you on a pedestal Drunk with power Your ivory tower Never stood, never could And around and around You hit the ground Reservation hellbound A surreal vision Of a human being
