Anti-Nowhere League

The victims of oppression

I had a vision of a new world  
Another hidden in the southern plain  
Far away from the western wars  
And in this land we shall start again

But in his anger...is a nation broken in two  
And the doors of ? shall be open for the chosen few  
And we call this land South Africa  
The Cape of hope to a northern star  
But that hope and peace will never be far  
Johannesburg  
Johannesburg

And we raise our children  
By the blade and bullet they learn  
But unrest in the homeland  
Crowds gather, the township burns

We stand divided  
But together we will show them all  
We can stand for so long  
We break away for the good of us all

And we call this land South Africa  
The Cape of hope to a northern star  
But that hope and peace will never be far  
Johannesburg  
Johannesburg  
Johannesburg

Here's to the future  
To a future we may never see  
Here's to the brave new world  
May we live in harmony

And we call this land South Africa  
The Cape of hope to a northern star  
But that hope and peace will never be far  
Johannesburg  
Johannesburg
