

## Come Along

Antidote

I am sick and tired  
Of all the work this week  
Get drunk and have a party  
That is what I need  
I've got my friends together  
We're gonna see the band  
Get rid of all frustrations  
This night will never end

Come along  
Before you know the night is gone

Don't wanna waste my weekend  
In front of the TV  
Get drunk and do the pogo  
That is really me  
I need to have some action  
I got to have some fun  
Get all the punx together  
The party has begun
