

Automatons

Anything Box

I can see a million faces plastered on the screen
I'll never know and yet I may you see
As long as I'm connected to them

All the lines are superficial
All emotions has been deemed

Erasable
Retrievable
Removable
Illogical

Everything is automatic
One by one they fall alone

Everything is automatic
Everything is automatic
Everything is automatic now

Somewhere in the world right now
Someone sat and watched t.v and they're lonely
The future is here
Get it while you can
The future is real
So go do what you can

Everything is automatic
Everything is automatic
Everything is automatic now

Everything is automatic
Everything is automatic
Everything is automatic now
