[Verse 1:]

Creep with me, as I crawl through your bloodstream Dirty as the bathroom in New York club scenes A chemical river that flows through veins of drug fiends Ob-scene, un-clean, love between teens It's chemical, phlegm that I spit, adrenaline kicks Flow through your body, make it stressful as shit What they inject into meat, into food you eat Nowadays will make you lazy and wanna go to sleep Chemicals seep in dirt, work deep in earth Spin babies in the womb feet first at birth Leaves embryonic fluid polluted and kids stupid Fruit juice diluted, your drinkin' water putrid The chemicals, heroine, built to be American Pussies puke blood, baby mamas miscarriage-in' Additives, preservatives, add to my nervousness Bad when it surfaces, the madness is murderous It's chemical

[Chorus: x2]
Chemical...
"So recognize when you feel it"
"What is it?" It's all chemical
Chemical...
"So recognize when you feel it"
It's chemical...

[Verse 2:]

It's probably the reason I'm havin' panic attacks Can't manage to relax, got me brandishin' gats Paranoid, thinkin' everybody's plannin' a trap It's just a chemical inside me I managed to tap And now there's fiends smokin' it, this weed's soaked in it It's more than just trees with a little coke in it A Pandora's box, stop, don't open it The euphoric feelin' revealin' the opiate Back when I was little and they had me on Ritalin I was chillin', literally zombie-type feelin' Addicted to caffeine like some sort of crack fiend Let it post through my veins like powerful vaccines You're dependent: toothpaste, soap, deodorant A chemical addiction without even knowin' it You listenin' right now? Your body is holdin' it A chemical dependency, no way to get over it It's chemical

[Chorus x2]

[Verse 3:]

Anthrax, death threats, X, enhance sex
Steroids effects pecs, abs, and biceps
Advil relieves pain, trees deceive brains
Add a little chemical, you start to see things
Water filled with fluoride will fix up your teeth
Hormones are gettin' pumped in pigs, chicken, and beef
Alcohol slurs words, Mydol controls birds
Xanax calms your nerves if your brain's disturbed

Vitamin C for health, to take care of yourself
And you can even cure AIDS if you got enough wealth
Food coloring tricks you, glucose addicts you
All the dirty shit in food is why your clothes don't fit you
Red Bull pumps your energy, weed fucks with memory
Coke mixed with Hennessy turns friends to enemies
Pills to stop pregnancies, slow the flow steadily
Incredible, we're based on a chemical dependency
It's chemical

[Chorus]
