Paranoia

Apoptygma Berzerk

Chew the pill that tastes like hell, but gives you strength Embrace the drug that makes you mad, cause still it turns you i nto

Something else

Feel the need for love grows stronger! Swap your mind for a mirrorsearch, and shake until the break of day

One day you'll realize that you were wrong
And you'll regret that all this happened
Did it (all) happen?
Some day you'll realize that you were wrong
(You'll be) Left with paranoia, (as your only friend)

Your mind is full of enemies, the room is full of energies
That want to take control
They're all around you, and you're all alone
Your mind is full of enemies, the room is full of energies
Haunting your soul
They're all around you, and you're on your own

One day you'll realize that you were wrong You'll regret that all this happened Some day you'll realize that you were wrong To be left with Paranoia
