## Goodbye

Apparat

(please put me to bed and turn down the light)

fold down your hands give me a sigh put down your lies

lay down next to me
don't listen when I scream
bury your doubts and fall asleep

find out I was just a bad dream

let the bed sheet soak up my tears
and watch the only way out disappear
don't tell me why
kiss me goodbye

for neither ever nor never goodbye neither ever nor never goodbye
