

# One More Time

April Wine

The man in the back smokes a pack and a half  
Sayin "One more time before we go!"  
The lady in the front wants to roll with the punches  
Just one more shot and then she'll know  
Everybody's feelin' alright  
Runners on an endless flight, so high

One more time before we go  
One more song on the radio  
One more time before we go  
One more song on the radio

The pretty boys stand just as close as they can  
Silhouetting lovers, such a sight  
Nobody stares, hey, why should they care  
You are what you are tonight  
Tomorrow we could all fade away  
They only wanna live for today, so high

One more time before we go  
One more song on the radio  
One more time before we go  
One more song on the radio

One more time

The world may be comin' apart  
The confusion they're feelin' comes straight from the heart  
All they know is the need that they have to be free  
So, let 'em, just let 'em be

The world may be comin' apart  
The confusion they're feelin' comes straight from the heart  
All they know is the need that they have to be free  
So, let 'em, just let 'em be

The smoke gets thicker as the night goes on  
Shadows dancing through the haze  
So outrageous, it's a sonic affair  
Only doing as they please  
You'll never hear a word about Heaven  
Or, what they'd have to do to fly, so high

One more time before we go  
One more song on the radio  
One more time before we go  
One more song on the radio  
One more time, yeah, before we go  
One more song on the radio  
One more time before we go  
One more song on the radio  
One more time
