

Good Morning Sunshine

Aqua

Ooooooh
Yeah
Ooooooh
Oooh, oooh

When the sun is up
On a clear blue sky
You will act like a lover
When the sky is gray
And the rain comes down
You will run for cover
Feel the heat, come out of cold
And your arm is touching me

Good morning sunshine
You're my only light
Lying with me, by my side
You keep me warm all day
Just stay with me

Good morning sunshine
Be with me all day
Just don't let the rain pass you by
When it's cloudy or windy and the snowflakes arrive
You somehow just make me, make me feel I'm alive

When you heat my fields
Then you light the stars
Fading away in the horizon
There's a million streets
Leading off the night
Waiting for sun to be risen
Feel the heat, come out of cold
And your arm is touching me

Good morning sunshine
You're my only light
Lying with me, by my side
You keep me warm all day
Just stay with me

Good morning sunshine
Be with me all day
Just don't let the rain pass you by
When it's cloudy or windy and the snowflakes arrive
You somehow just make me, make me feel I'm alive

Hold it right there, let me take a minute of your time
To explain how I feel through these rhymes
I do the best I can, and believe me, if I could
I'd build you a paradise with these two hands
The top of your skin makes my body go numb
I'm thinking to myself, if my dream come true
Or is it 'cause you never give me a chance to tell you how I feel
The moments we had were too precious to kill

Oooh, when it's cloudy or windy

Please turn your face at me

Good morning sunshine
You're my only light
Lying with me, by my side
You keep me warm all day
Just stay with me

Good morning sunshine
Be with me all day
Just don't let the rain pass you by
When it's cloudy or windy and the snowflakes arrive
You somehow just make me, make me feel I'm alive

Ooooooh
Make me feel I'm alive
