

# Good Morning Sunshine

Aqua

Ooooooh  
Yeah  
Ooooooh  
Ooh, ooh

When the sun is up  
On a clear blue sky  
You will act like a lover  
When the sky is gray  
And the rain comes down  
You will run for cover  
Feel the heat, come out of cold  
And your arm is touching me

Good morning sunshine  
You're my only light  
Lying with me, by my side  
You keep me warm all day  
Just stay with me

Good morning sunshine  
Be with me all day  
Just don't let the rain pass you by  
When it's cloudy or windy and the snowflakes arrive  
You somehow just make me, make me feel I'm alive

When you heat my fields  
Then you light the stars  
Fading away in the horizon  
There's a million streets  
Leading off the night  
Waiting for sun to be risen  
Feel the heat, come out of cold  
And your arm is touching me

Good morning sunshine  
You're my only light  
Lying with me, by my side  
You keep me warm all day  
Just stay with me

Good morning sunshine  
Be with me all day  
Just don't let the rain pass you by  
When it's cloudy or windy and the snowflakes arrive  
You somehow just make me, make me feel I'm alive

Hold it right there, let me take a minute of your time  
To explain how I feel through these rhymes  
I do the best I can, and believe me, if I could  
I'd build you a paradise with these two hands  
The top of your skin makes my body go numb  
I'm thinking to myself, if my dream come true  
Or is it 'cause you never give me a chance to tell you how I feel  
The moments we had were too precious to kill

Ooh, when it's cloudy or windy

Please turn your face at me

Good morning sunshine  
You're my only light  
Lying with me, by my side  
You keep me warm all day  
Just stay with me

Good morning sunshine  
Be with me all day  
Just don't let the rain pass you by  
When it's cloudy or windy and the snowflakes arrive  
You somehow just make me, make me feel I'm alive

Ooooooh  
Make me feel I'm alive
