We dreamed a dream - woke up and lived it
We had the music in our hands
The drops of rain - became a river
And now it's time to end this dance
- So thank you

My mamma said that the best thing in life Was getting me
And loving somebody higher than anything else in this world baby
My mamma said that she would give her life up for me

My mamma said that the worst thing in life Is getting used to loving somebody higher than anything else in this world baby Knowing you're going to Knowing you're going to - lose it all

Mamma don't leave - don't go Don't run - don't hide - don't cry Don't ever feel scared now Mamma just crossed just crossed To the parallel world

She crossed she crossed to the multiverse
Circling protons - all vibrations
Circling neutrons - all vibrations
Mamma just crossed just crossed to the parallel world
She crossed she crossed to the multiverse
And now you're lying there - taking your last breath
I'm holding back the tears - Oh mamma don't die

My mamma said...

Mamma hold on - give in - let go
Release yourself from everything out there
Mamma just crossed just crossed
To the parallel world
She crossed she crossed to the multiverse
Circling electrons - all vibrations
Circling electrons - all vibrations
Mamma just crossed just crossed to the parallel world
She crossed she crossed to the multiverse
And now you're lying there - taking your last breath
I'm holding back the tears - Oh mamma don't die

My mamma said...
