

Lead me or follow
Feed me or swallow
If this ain't the real thing I don't want the real thing
Ignore me, I sit here, I know where I fit here
You don't give a shit dear but really I do

Oh take me with you, I'd crawl through coal to kiss you
Just give me that sign and then I'll be

I used to be so tired a bit like I had expired
But woman you saved me, you came and enslaved me
Now I know exactly what to do, I know exactly where to go
This is just how I dreamt it might turn out to be

Come on disrespect me cause I know that you'll protect me
Just give me that sign and then I'll be here, yeah

Baby when I'm with you nothing seems to matter
Baby when I'm with you nothing seems to matter
Nothing seems to matter

Stars spinning round me, how will they ever find me
Everything seems so long ago
There's no need to worry cause we don't need anybody
Just give me that sign and then I'll be here, yeah

Baby when I'm with you nothing seems to matter (5x)
Nothing seems to matter
