

To the Wonder

Aqualung

There's a song we sing
Elemental sound
Where it all begins
It can draw you in, drag it out

But it's hard to hear
That distant voice
It would ring so clear
If we could only tune out the noise

To the wonder

There's a song we know
If you listen close
It will always be
As it always was
It always was, it always was
Elemental sound
Running underneath it all

To the wonder
To the wonder
To the wonder
