

# I Gave It All

Aquilo

This glass it breaks  
So delicate it shatters round my feet  
And my hands, they bleed  
A stain I'll always remember  
A stain that stays with me

But this changes you  
It's harder now we're breaking  
And I should know it's never right for me to say  
That I wanted this  
I know I can't but I can still recall

I gave it all  
Given up on luck my head's above the dust

This love you broke  
Come closer darling don't forget to fake  
A smile you had  
You tried so hard to fool yourself instead

You gave it all  
Given up on luck your head's above the dust  
You gave it all  
I waited by the other side my friend

I've waited by the other side  
I've waited by the other side my friend  
I've waited (by the other side my friend)  
You'll find it funny when you're looking back some day  
The love you know  
The love you know  
You'll find it funny when you're looking back some day

You gave it (all)  
You'll find it funny when you're looking back some day  
The love you know  
The love you know

Given up (on luck your head's above the dust)  
You'll find it funny when you're looking back some day

You gave it (all)  
You'll find it funny when you're looking back some day  
The love you know  
The love you know

I waited (by the other side my friend)  
You'll find it funny when you're looking back some day
