Step outside my feet meet the pavement And im alright Ladadada

I drive up and i see her outside Honey please come back to me just one time

So what Are you doing here

You know exactly What im doing here

Just let this go i can't let gooo

And she's got me screaming At night when im dreaming

Hes got me thinking
Im not good for anything

Look at this mess we've made With only ourselves to blame

I know all about your midnight mistakes But i play dumb Because the truth i can't face

And i know about
All your mistakes
Like all of the guys
You were with on spring break

Come on just stop
Im so sick of fighting

And i look fine now But inside im just dying

Just let this go i can't let go

And she's got me screaming At night when im dreaming

And he's got me thinking Im not good for anything
