

Heartburn

Architects

Burn everything you have
And leave it all behind
Lose all your inhibitions
I'll take the mess you made
And make it beautiful
Oh if time only stood still forever

Hold out your hand and lean upon me
I'll be the one to make you smile
Hold out your hand and lean upon me
I'll be the one to make you smile again
Hold out your hand and lean upon me
I'll be the one to make you smile
Hold out your hand and lean upon me
I'll be the one to make you smile again

This moment that we're in
Is slow and disappointing
Time will never stand still forever
If you take this chance we got
And we'll make it beautiful
If you'd take my word

I'd be your savior

Hold out your hand and lean upon me
I'll be the one to make you smile
Hold out your hand and lean upon me
I'll be the one to make you smile again
Hold out your hand and lean upon me
I'll be the one to make you smile
Hold out your hand and lean upon me
I'll be the one to make you smile again

Hold out your hand and lean upon me
Hold out your hand and lean upon me
Hold out your hand and lean upon me
Hold out your hand and lean upon me
I'll be the one to make you smile again

Burn everything you have
And leave it all behind
Lose all your inhibitions
I'll took the mess you made
And I made it beautiful
Oh if time only stood still forever, forever
