

# Everything's Blue

## Architecture in Helsinki

Okay

You've been singing, "I got a witness"  
Down in the bedroom, mindin' my business  
Behind bars like an honest kid  
If freedom was a curse then we'd be through with this

Flaunt your life, don't keep it a secret  
Stay shallow, don't jump in the deep end  
I don't do styles and you never did  
The sky is cavin' in and you're way cool with it

Now everything's blue  
Only ever see the world in black and white  
The colour we choose  
In the morning is the colour of the night

[Of the night]

Get your body, walk at the same time  
ATO, I'm crossing the date line  
From a time like now to a time like years  
Remember where we are, I'm gonna bring you tears

Husband singing, "I got a witness"  
UFO, I don't want to miss this  
I don't leave stars and you never did  
The sky is caving in and you're way cool with it

Now everything's blue  
Only ever see the world in black and white  
The colour we choose  
In the morning is the colour of the night

If dreams where trouble  
I'd be rubbing shoulders with thieves tonight (Whoa, whoa)  
And you can beat it baby, now my mind is blown  
I found a universe to call my own

Now everything's blue  
Only ever see the world in black and white  
The colour we choose  
In the morning is the colour of the night

[Of the night I don't want to miss this Don't want to miss this You don't  
t want to miss this I don't want to miss this Don't want to miss this Yo  
u don't want to miss this]
