Grey

when everyone agrees with you you know you're wrong when everyone embraces you you don't belong

nothing these days means what it says everything's gone grey

takes a life to live to learn
where love comes from
only takes three little words
to know it's gone

nothing these days means what it says everything's gone grey

if you don't want to know the score then just turn away back to the world where papers burn and words decay

nothing these days means what it says everything's gone grey
