

# Shipwrecked Frontier Pioneer

Arcturus

Mechanical shutdown due to reactorcore meltdown  
And outdated parts collapsed and discharged  
Autopilot on emergency power from  
Random fuel devoured  
Red alert sirens sighing  
Rusty pipelines dying  
Empty hull shatter into cold dark matter  
Unknownspacepioneer the end draws near  
What once was acrobatically flying  
Is now burnt out and dying  
Now that I am shipwrecked  
A piece of shit falling  
Through space and time  
Moaning oh why oh why did not I  
Just stop in time  
Knowing the answer I am dirty as a cancer  
Once a virus like me is set free  
Old grim flashes his grin  
And violently introduces  
A shortcut for losers  
Drop all illusions as I pop the next fuse in confusion  
Transvesting the mind evolving past mankind  
Unknownspaceadorer toxicwasteexplorer  
Lost in free will time stand still  
Full front on  
Drifting here in the outer rim  
As a piece of spacejunk  
No valuables within  
A scraphead of sin  
Too much acid in these batteries  
Leaking out its filthy grease  
Disband all current settings to standard default  
Fall and arise you diamond of lies  
You know what is wise  
Fire or ice  
That's when I find  
Hyperspace-central-divine  
A pitstopmaintenance hall for the mind  
Satanic protectors of my kind  
I shop some new parts  
Re plugged and charged  
I head towards the stars  
Knowing that this trip  
Will be my last slip
