

Our Beast

Ari Koivunen

I've tried to see things your way
You always hide more things inside,
Guns to blow me away.

I'm at the edge of all things gone unreal.
Taking punches that I just can't feel.
Can't feel a thing.

War forever raging on
Before all the flags are torn,
Feed our beast of war,
Forever raging on.

Oh how did we end up here?
Where a tongue's a blade now, through my heart somehow.
And every tear turns red with hate and fear.

I'm at the edge of all things gone unreal.
Rolling with punches that I just can't feel.

War forever raging on
Before all the flags are torn,
Feed our beast of war,
Forever raging on.

Over the edge of all things gone unreal.
All over me the wounds I just can't feel
But I wish it could...

War forever raging on
Before all the flags are torn,
Feed our beast of war,
Forever raging on.
